Professional Summary

Senior Full-Stack Engineer with 6+ years of experience building cloud-native, microservice-based web applications with TypeScript, Golang, React.js, Node.js and Python. Strong in high-performance Go backends (goroutines, buffered channels, context cancellation), React/Next.js frontends, REST APIs and event-driven systems on AWS and Google Cloud. Experienced in aviation, oil & gas, fintech and healthcare, with a track record of delivering scalable, secure systems to production.

Technical Skills

Languages: TypeScript, JavaScript, Golang, Python
Backend: Node.js, Express, NestJS, Gin, Microservices, REST, gRPC, Kafka, AWS SQS, AWS SES
Frontend: React.js, Next.js, Angular, Redux, Zustand, Material UI, Tailwind
Database: MySQL, PostgreSQL, MongoDB, Redis, Elasticsearch, GORM, Prisma
Cloud & DevOps: AWS, Google Cloud, CI/CD (GitLab, GitHub Actions), Docker, Kubernetes
Practices & AI Tools: TDD, Claude CLI, Cursor, Gemini, GPT

Professional Experience

BP (via DAPL IT)

Kuala Lumpur, Malaysia
Senior Software Engineer — Mar 2026 – Present

- Architected and led development of Recurring Fleet reporting on high-volume transactional data.
- Engineered the complete Xero invoice integration, from architecture to deployment: invoice creation and sync between internal services and Xero APIs.
- Architected a high-throughput Bulk Card Management flow using multiple SQS queue/consumer patterns to process batch operations asynchronously.
- Automated the order-to-invoice lifecycle, letting B2B fleet customers order fuel cards in bulk and receive invoices directly in Xero.

AirAsia (via Oxydata Software)

KLIA2, Sepang, Malaysia
Senior Software Engineer — May 2025 – Jan 2026

- Architected and deployed the Prebook Meal API, enabling reporting for warehouse and cabin crew.
- Developed Tail Assignment and Recovery Plan modules in React.js + NestJS, improving scheduling accuracy and reducing manual coordination.
- Enhanced operational restriction modules to prevent flight scheduling conflicts.
- Developed Tail Assignment custom Gantt Chart visualizing flight recovery and maintenance line.
- Implemented CI/CD pipelines on Google Cloud to automate deployments and testing.
- Delivered the Prebook Meal and SKYIQ projects on schedule; recognized for improving reliability and cross-team collaboration.

Petronas Digital Sdn Bhd (via Skill Quotient)

Kuala Lumpur, Malaysia (Remote)
Software Engineer (Intermediate) — Jul 2023 – Mar 2025

- Built a real-time vessel-tracking dashboard using React.js and Pings API, reducing latency and improving monitoring responsiveness.
- Enhanced the live vessel and pipelines map showing voyage tracking from shipment to delivery.
- Automated alert and email notification services with Node.js microservices and AWS SES, acceler-

ating incident reporting.

- Integrated Spire Weather API for dynamic vessel-route adjustments during severe weather, wave height, and visibility.
- Delivered Sentinel (real-time monitoring and alerting) and STEAR (logistics optimization) to production with zero regression.

Venturas Ltd. *Dhaka, Bangladesh*
Full-Stack Developer Sep 2022 – Jul 2023

- Developed high-volume geospatial search system indexing 2.6M+ records across Japan.
- Enhanced monthly invoice mail automation, improving client communication accuracy.
- Built a concurrent land-acquisition processing pipeline in Go using goroutines, buffered channels, WaitGroup and Mutex to guarantee data safety under load.
- Upgraded map visualization with color-coded polygons for land acquisition management.

Renssoft Solutions Ltd. *Dhaka, Bangladesh*
Software Developer (Mid-Level) Apr 2021 – Sep 2022

- Processed 4M+ prescription records into Elasticsearch, improving search performance by 50%.
- Developed Rheumatology section for the Prescription module, improving doctor usability.
- Fixed multi-generic medicine search bugs, enhancing accuracy and trust among users.

Initux Software Ltd. *Dhaka, Bangladesh (Remote)*
Junior Full-Stack Developer Mar 2020 – Apr 2021

- Engineered multi-vendor e-commerce APIs using Node.js + Express, enabling vendor onboarding and order automation.
- Integrated Vultr and NameSilo APIs for automated server and domain provisioning.
- Served as Project Lead for the domain and server management system.

Education

Bachelor of Science in Computer Science and Engineering
Premier University, Chittagong, Bangladesh Jan 2017 – Apr 2022
